Memo to File:

Re: Bridger Jack Mesa Mine
DOE/037/001 - ML 29399
San Juan County, Utah

This small uranium mine located on State land was visited on June 28, 1978 by Jim Smith and Mike Thompson. Under the terms of the State lease Mr. Stocks was to submit a bond in March, 1978 before mining could continue. The bond has not been submitted.

The mine was being actively worked on the date of the visit. A truck loaded with ore (License # TV 4057) was observed leaving the site. Upon its return the driver was requested to inform Mr. Stocks that the bond must be submitted to State Lands. Other equipment at the site included an air compressor, a mine truck, and a 1972 Dodge pickup owned by Eugene Hill of Moab (License # TV 4057).

Recent drilling has occurred on the flat below the mine adjacent to the mesa edge. Approximately nine (9) holes (6 inch diameter) were left unplugged. These holes were not observed on the March 24, 1978 field inspection. The driver of the ore truck thought that the drilling was done by Clayton Stocks. The holes were numbered BJ-78-1 through 9.
